

# STAY-HANDSFREE, STAY-CORONAFREE

## THE BEST PRECAUTIONARY MEASURES

### **HANDS HYGIENE:**

We are all aware of the PANDEMIC of COVID-19 the Novel Corona Virus Outbreak since Dec 2019. Now it has started spreading in our country also. We are also aware that we don't have any Vaccine or Medicine to prevent/cure it perfectly.

Scientists and Researchers are on their toes working to find the Solution. So, in such a challenging time, best is to take CARE- through Precautionary Measures and increase the awareness in Cleanliness and Hygiene about our personal health, especially our Hands.

SHALLOW WATERWAYS SHIPPING PVT LTD always love to take the Challenges in Solving Sectorial, Societal and Natural issues. Now this time, it is the Challenge of Stopping the Spread of NOVEL CORONA VIRUS.

So, we found a huge gap of knowledge in maintaining HANDS HYGIENE while cleaning Hands with soap and water.

### **Problem/ Knowledge Gap:**

We all use Water TAP for cleaning hands. For that we Open TAP with Infected or dirty Hands and thus transmit Virus, Bacteria or Dirt on Tap knob. We wash our Hands and clean it thoroughly, next for closing TAP we again touch Infected or dirty TAP knob with Clean hands which makes our Hands again Infected and dirty. So, all precautions or purpose of cleaning hands goes in vain.

### **Solutions:**

- 1) USE HANDSFREE TAPS – 3L-TAP: Designed & Recommended by us, which is designed with focusing in mind about -LOW-COST, LOW-MAINTENANCE & LONG-LIFE. 3L-TAP removes all possibilities of Unclean and Unhygienic Hands after Hand Wash. Ultimately gives 100% result in HAND HYGIENE or Virus or Bacteria free Hand Wash. Simultaneously it saves Water @30% during each usage.

v/s

- 2) Wash your Tap simultaneously while washing your Hands. (Protocol. Not Recommended due to wastage of Water.)

v/s

- 3) Use Tissue paper for closing Tap knob. (Not Recommended due to an Environmental issue.)

CONCLUSION: 3L-TAP gives Twin benefits: PERFECT HYGIENE & Saving WATER.

Thanks.

## 3L-TAP

Use **HANDSFREE TAP**

OR

**CLEAN TAP** Also Where You Touched To Open It

OR

USE **TISSUE PAPER** to close the Tap so that your cleaned Hands won't get Infected again.
